

# Home Learning Activity - Maths

Today, we are going to look at measuring units of time. When we talk about how much time has passed, we use seconds (a short amount of time, for example, washing your hands), minutes (a longer amount of time for example, eating a meal, tidying up or reading) and hours (a long amount of time for example, sleeping or going on a walk)

How long do you think a minute is? Ask a grown up to set a minute on their phone. Stand up when you think a minute has passed. How close were you? Have a go at seeing how many of these things you can do in a minute! Can you beat your score? You can play this with your family.

How many houses can you draw in a minute?

Guess	Count

Starting from one, how many numbers can you write in a minute?

Guess	Count

How many times can you write your name?

Guess	Count

How many bricks can you use to build a tower in one minute?

Guess	Count

How many 1ps can you draw in one minute?

Guess	Count

**Challenge 2:** How else do we measure time? Can you go on a clock hunt around your house? How many different clocks can you find? What is the same and different about all of these clocks? Have a go at making your own clock using the template attached. You could try copying the times the clocks are showing. Can you spot the minute hand and the hour hand?

# Home Learning Activity - Literacy

This week, read "Supertato" by Sue Hendra. If you don't have the book to hand, you can watch it through this clip.

<https://www.youtube.com/watch?v=rze89HB9u8g>

Afterwards, try and complete Miss Leggett's challenges. You can choose as many as you like to complete.

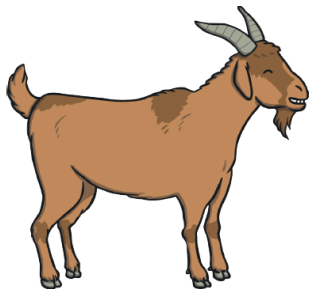

1. Can you make your own veggie superhero? What is their super hero name? Where do they live? Who is their nemesis?
2. Can you write your own story using your superhero veggie, or a new adventure for Supertato? You could write a different part each day.
3. If you were a superhero what would be your super power? Draw yourself in your superhero costume. Where would you have your secret hide out? What powers would you have? How would you save the world?

## Reading Challenge

- ⇒ Can you read the sequels of the Supertato adventures? If you don't have the books, try and find them on Youtube. Which book is your favourite? Can you tell me why?
- ⇒ Draw a picture of your favourite part of the story
- ⇒ Can you find some other books about superheroes? What happens in the stories? Can you tell me who your favourite superhero is?

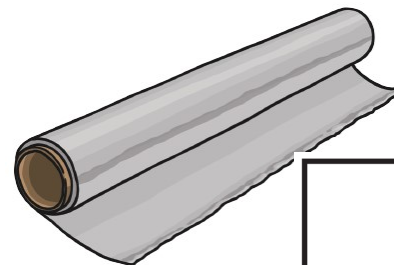

# Home Learning Activity - Spelling

These words are all jumbled up! Can you show me the correct way to write them? Remember when using phoneme frames, write one sound in each box (have a look at the first one Miss Leggett has done for you).
